ECONOMICS OF AGRICULTURE OF FOREIGN COUNTRIES AND  
U. S. FOREIGN AGRICULTURAL TRADE  
A Selected List of Publications Prepared or Sponsored by the  
Economic Research Service, April 1, 1961 - March 31, 1966

Compiled by Arthur W. True  
Assistant to the Deputy Administrator  
Economic Research Service

INTRODUCTION

This reference list is designed to meet the needs for a cumulative, concise source of information on the published material of the Economic Research Service in the areas of foreign markets, trade and competition, and economic development of foreign countries since the agency was established in 1961.

The list includes publications produced or sponsored by the two foreign agricultural economics divisions of the Economic Research Service during the period April 1, 1961 through March 31, 1966. A few reports present results of research performed by the Foreign Agricultural Service prior to organization of ERS in April 1961, and published by ERS. The list is intended to include citations for all published research material of more than temporary interest regardless of the form in which it was published or of current availability.

As indicated by the table of contents, citations are arranged by research divisions performing the research. The grouping within divisions is the same as that used in annual progress reports.

Publications cited consist principally of items issued as parts of USDA and ERS numbered series. Also a number were published as articles or chapters in periodicals, proceedings, reports or books produced by the Department of Agriculture or other producing agencies. For the Foreign Development and Trade Division a large number of analyses, statistical summaries and author name articles in the periodical, Foreign Agricultural Trade of the U. S., are indexed by the month of the publication.

Brevity of citations is essential for effective use of the sequential bibliographical card system used for ERS publications. Abbreviations therefore are kept as short as possible. A key to abbreviations used is provided as a guide for users of the list.

The publications were produced at many different locations and distributed through many different channels. Citation of published materials gives no indication that copies are available for distribution. Generally, reference copies can be found in libraries. The National Agricultural Library, USDA, is prepared to furnish photostatic copies of many publications. Bulletins and other reports of state experiment stations can usually be obtained from issuing institutions. Some items produced by contractors or other non-public firms can be obtained from publishers. Most of the economic publications issued by the USDA in the past two or three years and some of those produced elsewhere can be obtained as single copies from the Division of Information, Office of Management Services, USDA, Washington, D. C. 20250.
